

VERSA-LOK[®]

Weathered Series
Mosaic[™]
Retaining Wall System

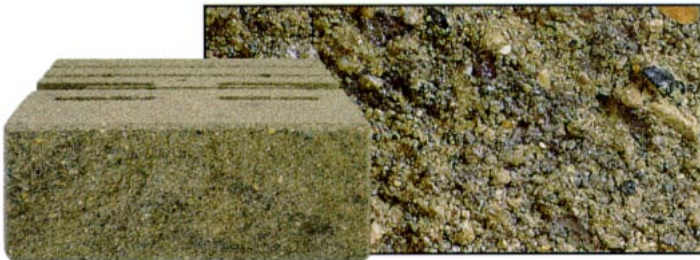

The Mosaic[™] Retaining Wall System utilizes units of varying heights and widths to achieve a random-like pattern. While complicated in appearance, installation is amazingly simple. Like all Versa-lok products, units are easily assembled without mortar, require no concrete footings, and are environmentally safe. The Mosaic[™] retaining units also undergo a “weathering” process to create a rustic old-world appearance that closely resembles natural stone.

Three different unit sizes are used to create a random appearance similar to natural stone walls.

ROSE CREEK BLEND

CHESTNUT BLEND

CHARCOAL BLEND

* Colors displayed on this sheet may differ from actual colors due to printing reproduction limitations and variances in production runs. For a truer representation of color, please request actual product samples .
